### CADENCE Korea Office Relocation Project

July 2012 Issue

Cadence Design Systems is a leading global EDA (electronic design automation) company, offering semiconductor devices with such phenomenal scale, complexity and technological challenges would not be possible without electronic design automation.

Cadence Korea occupies 9th floor at Mtek Vision Building, located in Bundang-Gu, Sungnam-Si, Korea, and the space is designed to accommodate 65 people and is beautifully divided between private office area and public area.

The idea driving the design of the new premises are;

“Innovative” – It is manifested by using dynamic lines, to express a feeling of Innovative with active energy flow

“Communicative” – It is a communicative office with refined circulation

“Multifunctional”- It is multi-useable space design, not only just for working, but also seminar, casual meeting, communication, rest and party

#### Our Services:
